PROFESSIONAL PROFILE

I am a growth web developer with 1 year of experience in Frontend and practising Backend with Nodejs and handling database in MySQL from last 3 months. Creative, sharp-minded person with leadership skills. Strong time-management skills and with the hunger to learn and grow more.

PROJECTS

College Alumni website
feb 2024 - work in progress

this is my ongoing project in which I am working with my colleague as team. This website features sign-in/sign-up with mobile number verification by OTP. ,providing memberships to users,and donation can be done directly by our alumni and all the data is handled in MySQL database.and the other technologies used are Ionic with angular,NodeJs,ExpressJs.

Spotify Clone
January 2024

Clone of music player with dynamic song albums and responsive design looking similar to Spotify original website. technologies used in this are HTML,CSS and JavaScript.

Portfolio
November 2023

My first portfolio with eye catching visuals with animations,transitions,responsiveness.and I make it available live on https://sq1754.me
